

Fanett Chair 55T

A days production of Fanett Chairs in 1967.

Edsbyn began producing Windsor chairs as early as 1936, using leftover wood from the ski manufacturing. The Fanett chair emerged in 1949 when factory foreman Lennart Karlstorp developed a chair design that minimized both weight and production costs. A few years later, the design was refined by Ilmari Tapiovaara and received the model name 55T. That's when sales truly took off. By the time production of Fanett ceased in 1970, over 5 million chairs had been sold. Ever since,

we've continued to receive inquiries about restarting production.

In 2025, we are proudly reintroducing the long-awaited Fanett in the 55T model, with a few subtle updates to the original design. Both the chair and the stool have been slightly elevated to align with today's standards, and the backrest is now crafted from birch sourced in Hälsingland, replacing the imported beech used in the original. This makes the Fanett Chair 55T, in 2025, more Swedish than ever before.

Edsbyn Factory

The secret of our success is the ability to change and adapt. What began in 1899 as a small carpentry, grew in to be one of the largest furniture factories in the Nordics. Between 1934 and 1984, we produced wooden skis for the Ministry of Defence, Olympic gold medal winners, and families. From the waste material, we manufactured pin-back chairs, which became well-known and cherished in Swedish homes.

As one of Sweden's oldest furniture companies, with roots in Edsbyn, we can proudly say that we have played a part in making the label Swedish Design synonymous with good form and function.
